Professional Summary

Software Engineer with 2+ years of experience building scalable backend systems and enterprise integrations within the .NET ecosystem. Specialized in ASP.NET Core, SQL Server optimization, and distributed system integrations for e-commerce and ERP platforms. Experienced in developing nopCommerce plugins, implementing OAuth-based integrations, and building reliable data synchronization pipelines. Proven ability to design maintainable architectures, optimize large datasets, and deliver production-ready software in Agile and distributed team environments.

Technical Skills

Backend Development: ASP.NET Core, ASP.NET MVC, C#, REST APIs, Web API

Frontend: Angular, AngularJS, Kendo UI, jQuery, HTML, CSS

Database Systems: MS SQL Server, Oracle, Entity Framework, LINQ, Query Optimization

System Integration: OAuth2 Authentication, OData APIs, Third-Party API Integrations

Cloud & DevOps: Microsoft Azure, Azure DevOps, CI/CD Pipelines, Git, GitHub, GitLab

Architecture: OOP, SOLID Principles, Clean Architecture, Repository Pattern

Engineering Practices: Agile Development, Code Reviews, Unit Testing, Secure Coding

Professional Experience

Software Engineer I

Brain Station 23 PLC

Oct 2025 – Present

Dhaka, Bangladesh

- Develop high-performance plugins for **nopCommerce (versions 4.60–4.90)** powering enterprise e-commerce platforms.
- Design and implement complex integrations with external systems including **Xero Accounting (OAuth2)**, **Wolt Delivery APIs**, and ERP platforms via **OData services**.
- Architect modular UI and backend extensions using custom model factories and view location expanders.
- Improve data processing performance by implementing **batch processing pipelines** and optimizing large SQL queries.
- Contribute to production features including automated accounting workflows, product catalog management, and delivery tracking systems.
- Collaborate in Agile teams using Git-based workflows, ensuring maintainable and scalable production deployments.

Junior Software Engineer

MultiTech Systems

May 2025 – Oct 2025

Dhaka, Bangladesh

- Developed ERP Human Resource Management modules using ASP.NET MVC and AngularJS.
- Improved backend performance through SQL query optimization and efficient API processing.
- Implemented error-handling and fail-safe mechanisms improving system stability.
- Collaborated with cross-functional teams in Agile sprints to deliver enterprise features.

Junior Software Engineer

Global Software Architects

Jun 2024 – Apr 2025

Dhaka, Bangladesh

- Developed intelligent vehicle tracking applications integrating OpenAI APIs.
- Improved security and performance of FinTech modules used for financial data processing.
- Refactored legacy modules using .NET Core and Angular to enhance scalability and maintainability.
- Participated in code reviews, Git workflows, and collaborative development practices.

Projects

Enterprise E-commerce Platforms (Intelisale & ActionWebsite) — nopCommerce, ASP.NET Core, SQL Server

- Contributed to the development and customization of enterprise e-commerce platforms built on nopCommerce.
- Developed and maintained custom plugins to extend platform capabilities across multiple nopCommerce versions.
- Implemented integrations with third-party services including ERP systems, accounting platforms, and delivery services.
- Optimized large product catalog operations and SQL queries to improve platform performance and reliability.

MultiTex ERP (HR Module) — .NET MVC, AngularJS, Azure, SQL Server

- Built HR management features including employee records, reporting modules, and backend optimizations.
- Improved system responsiveness by optimizing database operations and API processing.

TYT Chatbot (Track Your Truck) — .NET Core, Angular, OpenAI API

- Developed an AI-enabled chatbot capable of responding to logistics queries and vehicle tracking requests.
- Applied prompt engineering techniques to improve contextual accuracy and system responses.

MPU (Mass Price Update) — .NET, Angular, Kendo UI

- Developed scalable UI components enabling bulk product price updates across large catalogs.
- Implemented clean architecture principles ensuring maintainable and modular code.

Education

University of Rajshahi

B.Sc. Engg. in Computer Science and Engineering

CGPA: 3.04 / 4.00

Jan 2018 – Oct 2023
